

# Semco Teak Products

## Teak Cleaner Technical Data Sheet

**Our 2-Part Cleaner is the most thorough way to clean your wood prior to sealing.**

**It deep cleans without harsh scrubbing to remove greying, fuel stains, teak oils and much more.**

**Cleaner is alkaline based and will not damage the wood, using both parts will leave your wood pH neutral.**

**We are proud that the unique formula that makes our 2-part Cleaner and Sealer is exclusively licensed to Semco.**

## **Semco 2 Part Cleaner:**

Semco 2 Part Cleaner is the most thorough way to clean teak. It deep cleans teak without harsh scrubbing to remove greying, food stains, fish blood, fuel stains and teak oils. Our cleaner is alkaline based and will not damage teak like some acid based cleaner can.

## **Applications:**

For use on all hardwoods, yachts, decks, rails, cockpits, swimming platforms, garden furniture, garage doors, wooden surrounds and frames.

## **Recommendations:**

When needed, if looking dirty or worn for preparation for sealer.

## **Technical Data:**

- Store above 5°C
- pH -7
- No VOC compounds

Allow time to dry thoroughly prior to sealing in order to avoid sealing in moisture.

## **How to Apply:**

Wet the area you would like to clean (do this in sections).

Apply Part 1 (Red) to the area. This should be applied using scouring pads to ensure strict control of the cleaning solution and quality of the cleaning. Once completed, rinse the area with water.

Apply Part 2 (Green) to the same area. Rub into the wood as before. This neutralises the Part 1 cleaner. Once completed, rinse again with fresh water and allow the wood to dry **thoroughly** prior to sealing.

## **Coverage Details:**

A **Pint** approx. coverage of 5m<sup>2</sup>

A **Quart** approx. coverage of 10m<sup>2</sup>

A **Gallon** approx. coverage of 40m<sup>2</sup>
